

# Responsible Annotation Services

Expert Data Annotation and Validation for highest-quality AI systems.

Responsible Annotation Services GmbH is a specialized provider of high-quality solutions around data annotation, supporting AI training and validation with precision, scalability, and expertise. As a spin-off of the non-profit organization Responsible Annotation, we leverage a unique combination of technical excellence and social responsibility to deliver top-tier annotation services in our offices in Vienna, Linz and Hagenberg.

Our team consists of **highly skilled annotators, mostly neurodivergent individuals** with exceptional attention to detail, pattern recognition, and perseverance. Many of our annotators are on the autism spectrum, and we provide an environment where they can fully leverage their strengths. Led by our **seasoned Annotation Managers** who have long experience with IT project management, our teams are dedicated to delivering superior data quality and ensuring project success through a structured and collaborative approach. No project too small, no project too big – we cover your back!

## Our Core Capabilities

1. **Creation of customized labeling instructions** – We develop clear, traceable guidelines that are precisely tailored to your use cases.
2. **Professional review of existing instructions** – Our team examines your current specifications and optimizes them for completeness, consistency, and practicality.
3. **Validation of instructions against real data sets** – Through targeted testing we ensure that your directives seamlessly align with existing data packages.
4. **Identification of optimization potential in data preparation** - We analyze your entire workflow and highlight concrete improvement measures to boost efficiency and quality.
5. **Quality-assured data annotation** – Our experienced annotators deliver precise, error-free labels.
6. **Bounding boxes, image segmentation, LIDAR data and many more** - We cover your back!
7. **Comprehensive review of already annotated data** – We conduct thorough quality checks, correct inconsistencies, and ensure that your annotated data meets the highest standards.
8. **Scalability & Rapid Deployment** - With a broad network of skilled annotators and domain experts, we can quickly scale teams to meet project demands.
9. **Flexibility on infrastructure** - We can work with whatever our customers request: OnPrem or in the cloud, in your system or our hosted environment. We also cover all mainstream annotation tools on the market
10. **Fully compatible with your data sovereignty needs**: All setups are compatible with strict data sovereignty, GDPR, and customer-controlled security requirements.

Start with a instructions review, pilot sprint, or independent quality assessment of your existing datasets.

## Why Choose Us?

- ✓ **Industry-Leading Annotation Quality**  
Customized workflows and iterative quality refinement
- ✓ **Expert Validation Services**  
Precision-driven review and optimization of existing annotations
- ✓ **Scalability & Rapid Team Deployment**  
Flexible resource allocation for high-volume projects
- ✓ **Strong Research & Expert Network**  
Access to AI specialists and advanced annotation techniques
- ✓ **Socially Responsible & Inclusive Workforce**  
Harnessing diverse talents for outstanding results

Partner with **Responsible Annotation Services** to elevate the quality and efficiency of your AI training data.
